EDUCATION

University of Texas at Arlington | 3.72/4.0 GPA

Bachelor of Science in Computer Science

Arlington, TX

Dec 2027

EXPERIENCE

Software Engineer Intern

June 2026 – August 2026

Business Wire

San Francisco, CA

- Programmed and shipped 12+ enhancements and defect fixes for subsystems of an enterprise Internet publishing platform using React, Node.js, Docker, Kubernetes, and Git.
- Reproduced, logged, and debugged assigned proofing-tool issues involving stale state, editor synchronization, word highlighting, and scrolling, eliminating 100% of known reproducible cases.
- Executed established test and regression workflows with engineers, QA, and product partners to validate changes and deliver reliable, production-ready software.

Owner & Operator - Popup Cafe Business

May 2025 – Present

Koicha LLC

Fort Worth, TX

- Founded and operated a popup cafe business, managing staffing, inventory planning, on-site service, and daily operations.
- Developed and enhanced a custom order-management and reporting system, migrating it from Google Apps Script and Sheets to a maintainable Python, Flask, and PostgreSQL stack.
- Automated order logging, receipt generation, daily reporting, and real-time metrics dashboards, reducing manual tracking and improving operational reliability.

PROJECTS

OpenLedger POS | Python, Flask, SQLAlchemy, PostgreSQL, React, TailwindCSS

- Engineered a self-hostable point-of-sale system with modular frontend, backend, and database subsystems as an open alternative to centralized SaaS platforms.
- Designed Flask REST APIs for authentication, orders, inventory, and business operations, exchanging structured JSON between React and Python components.
- Modeled stores, users, items, and orders in PostgreSQL with SQLAlchemy, enforcing relationships and data integrity for reliable backend behavior.

Finding Underrated Music Through ML | Scikit-Learn, XGBoost, Pandas, Seaborn, Matplotlib

- Designed a pipeline to separate intrinsic item quality from artist and genre popularity signals, improving model fairness and interpretability.
- Implemented scalable feature transformations with vectorized Pandas operations and group-based aggregations.
- Applied and evaluated XGBoost models to capture complex interactions in high-dimensional feature space.

OPEN SOURCE CONTRIBUTION

Meta — Lexical

- Contributed enhancements and fixes to Lexical, Meta's extensible React-based rich-text editor framework.
- Investigated and reproduced reported issues, debugged root causes, and implemented changes within a large TypeScript/React monorepo.
- Updated editor subsystems involving Markdown shortcuts, history management, and plugin behavior, following established project workflows.

TECHNICAL SKILLS

Languages: C, C++, C#, Java, Python, SQL, JavaScript, HTML/CSS

Systems & Data: Node.js, Flask, REST APIs, PostgreSQL, SQLite, MySQL, SQLAlchemy, CRDTs, Yjs

Testing & Tools: Git, Jira, Docker, Kubernetes, Google Cloud Platform, Visual Studio, IntelliJ, Eclipse

Frameworks & Libraries: React, Next.js, Pandas, NumPy, Scikit-learn, XGBoost

Technical Domains: Software Debugging, Application Development, DevOps, Data Analytics
