EDUCATION

University of Texas at Arlington | 3.72/4.0 GPA

Bachelor of Science in Computer Science

Arlington, TX

Dec 2027

EXPERIENCE

Undergraduate ML Researcher

University of Texas at Arlington

August 2026 – Present

Arlington, TX

- Developing an SQL-based retrieval pipeline to construct representative coresets from relational databases for RT-J training.

Software Engineer Intern

Business Wire

June 2026 – August 2026

San Francisco, CA

- Shipped 12+ production enhancements and defect fixes for an enterprise publishing platform, improving proofing and editing workflows.
- Diagnosed and resolved issues involving stale state, editor synchronization, word highlighting, and scrolling, eliminating all known reproducible cases within the assigned scope.
- Developed and validated changes using React, Node.js, Docker, Kubernetes, and Git, collaborating with engineering, QA, and product teams through regression testing and release.

Owner & Operator — Popup Cafe Business

Koicha LLC

May 2025 – June 2026

Fort Worth, TX

- Founded and scaled a popup cafe featured in two university news articles, generating 40+ minute customer lines at partner events while recruiting and leading a team of 9 employees
- Built a Python, Flask, and PostgreSQL order-management system that automated order logging, receipts, reporting, and operational dashboards.

PROJECTS

OpenLedger POS | *Python, Flask, SQLAlchemy, PostgreSQL, React, TailwindCSS*

- Engineered a self-hostable point-of-sale system with modular frontend, backend, and database subsystems as an open alternative to centralized SaaS platforms.
- Designed Flask REST APIs for authentication, orders, inventory, and business operations, exchanging structured JSON between React and Python components.
- Modeled stores, users, items, and orders in PostgreSQL with SQLAlchemy, enforcing relationships and data integrity for reliable backend behavior.

OPEN SOURCE CONTRIBUTION

Meta — Lexical | *TypeScript, React*

- Contributed fixes and enhancements to Meta's Lexical editor by reproducing reported issues, debugging root causes, and implementing changes in its TypeScript/React monorepo.
- Updated Markdown shortcuts, history management, and plugin behavior while following established contribution and testing workflows.

TECHNICAL SKILLS

Languages: C, C++, C#, Java, Python, SQL, JavaScript

Frameworks & Libraries: React, Next.js, Node.js, Flask, SQLAlchemy, Pandas, NumPy, Scikit-learn, XGBoost

Systems & Tools: PostgreSQL, REST APIs, Git, Docker, Kubernetes, Google Cloud Platform, Jira, CRDTs, Yjs
